The revolutionary technology that protects you

La rivoluzionaria tecnologia che ti protegge

It is shown that in all buildings the surfaces are populated by microorganisms, which are deposited by sedimentation or contact. Anyone who attends a place with contaminated surfaces are at risk of more or less serious diseases and, in the case of weaker subjects, they can also be fatal and lead to death.

È dimostrato che "in tutti gli edifici" le superfici sono colonizzate da microrganismi che si depositano per sedimentazione o contatto. Chiunque frequenti un luogo con superfici contaminate è a rischio di malattie più o meno gravi e, nel caso di soggetti più deboli, le stesse possono essere anche fatali e portare alla morte.

In a building, therefore, surfaces play an important role in the spread of pathogens and this real risk is very often underestimated and should be addressed with the right technologies. Whether it's clinics, airports, kindergartens, schools or private homes, the IAM+ handrail systems help to maintain a high hygiene standard, eliminating 99% of the pathogens present on their surfaces making them effectively **antibacterial**.

In un edificio, quindi, le superfici giocano un ruolo importante nella diffusione di agenti patogeni e questo rischio reale è molto spesso sottovalutato e dovrebbe essere affrontato con le tecnologie giuste. Che si tratti di cliniche, aeroporti, asili, scuole o abitazioni private, i sistemi Corrimano IAM+ contribuiscono a mantenere elevati standard igienici, eliminando il 99% degli agenti patogeni presenti sulle loro superfici e rendendoli di fatto **antibatterici**.

"I am the revolutionary solution for the hygiene of public places"

24-hour sanitation / Sanificazione 24 ore su 24

It combines the best antibacterial technologies to offer higher protection

Abbina le più comprovate tecnologie antibatteriche per offrire una protezione superiore

Why use IAM+?

Perché utilizzare IAM+?

Why use **IAM+**?

Thanks to its antibacterial properties, **IAM+** is able to kill and eliminate 99.9% of bacteria and other pathogens.

Perché usare **IAM+**?

Grazie alle sue proprietà antibatteriche, **IAM+** è in grado di uccidere ed eliminare il 99,9% batteri ed altri agenti patogeni.

PRIVATE HOMES ABITAZIONI PRIVATE

Returning home, the risk of bringing bacteria with you is high, but thanks to the IAM+ accessories by IAM Design you can protect your home and loved ones.

Al rientro a casa, il rischio di portare con sé batteri è alto, ma grazie agli accessori IAM+ di IAM Design è possibile proteggere la propria casa ed i propri cari.

HOSPITAL AND MEDICAL CLINIC OSPEDALI

Hospitals are by nature places with a high risk of contagion. Thanks to IAM+ it is easier to protect the health of doctors, operators and patients.

Gli ospedali sono per natura luoghi ad alto rischio di contagio. Grazie ad IAM+ è più facile proteggere la salute di medici, operatori e pazienti.

PUBLIC PLACES LUOGHI PUBBLICI

It helps to reduce contagion eliminating the bacteria it comes into contact with, thus IAM+ surfaces safe to touch.

Aiuta a ridurre i contagi eliminando i batteri con cui entra in contatto, rendendo così le superfici IAM+ sicure da toccare.

KINDERGARTENS AND SCHOOLS ASILI E SCUOLE

IAM+ protects young people in a notoriously crowded environment, especially in schools where students do not always know the importance of careful hand hygiene.

IAM+ protegge i giovani in un ambiente notoriamente affollato, soprattutto nelle scuole dove gli alunni non sempre conoscono l'importanza di un'attenta igiene alle mani.

It kills more than **99,9%** of bacteria

Uccide più del **99,9%** dei germi

The handrails with **IAM+** treatment slowly release silver ions which, in a few minutes, **kill more than 650 species of germs**, including Escherichia Coli, Legionella Pneumoniae, Salmonella Enteritidis, and others. Silver ions are safe for humans, as they only attack bacteria and inhibiting their ability to reproduce.

I corrimani con trattamento **IAM+** rilasciano lentamente ioni d'argento che "in pochi" minuti **uccidono più di 650 specie di germi**, tra cui Escherichia Coli, Legionella Pneumoniae, Salmonella Enteritidis e altri. Gli ioni sono assolutamente sicuri per gli esseri umani, in quanto attaccano soltanto i batteri inibendo la loro capacità di riproduzione.

—○— With IAM+ / Con IAM+

—○— Without IAM+ / Senza IAM+

The problem

THE RISK OF CONTAGION

It is shown that surfaces in public places are one of the main channels of the spread of viruses and bacteria.

Il problema

IL RISCHIO DEL CONTAGIO

È dimostrato che le superfici nei luoghi pubblici sono uno dei principali canali di diffusione di virus e batteri.

The solution

PROTECTED BY IAM+ ANTIBACTERIAL NANOTECHNOLOGY

The antibacterial and virucide properties of nano silver particles eliminate and kill the pathogens they come into contact with.

La soluzione

PROTETTO DA NANOTECNOLOGIA IAM+

Le proprietà antibatteriche e virucide delle nano particelle d'argento eliminano e uccidono i patogeni con cui entrano in contatto.

IAM+ technology combines natural antibacterial and virucide properties of silver with metallic surfaces of common use in construction.

For a safe contact experience.

La tecnologia **IAM+** combina le naturali proprietà antibatteriche e virucide dell'argento con superfici metalliche di uso comune in edilizia.

Per un'esperienza di contatto sicura.

The **patented silicone-based protective film** evenly distributes silver salts, making the surface of IAM+ antibacterial products, lengthening and improving their protection.

Il **film protettivo brevettato a base siliconica** distribuisce uniformemente i sali d'argento rendendo la superficie dei prodotti IAM+ antibatterica oltre che allungandone e migliorandone la protezione.

How it works?

Come funziona?

Silver ions present on the surface IAM+ immediately attack bacteria that settle on the surface inhibiting them in a very short time and eliminating the danger. The treatment provides 24-hour constant protection.

Gli ioni d'argento presenti sulla Superficie IAM+ aggrediscono immediatamente i batteri che si depositano sulla superficie inibendoli in brevissimo tempo ed eliminandone la pericolosità. Il trattamento garantisce una protezione costante 24 ore su 24.

The behavior of bacteria in comparison

Il comportamento dei batteri a confronto

Bacterium Batterio	Hours Orario	Standard handrail Corrimano standard	IAM+
Escherichia coli	00:00 h	160.000 number of bacteria at the time of infection	160.000 number of bacteria at the time of infection
Escherichia coli	+24:00 h	↑ +99,999%	↓ 0%
Stafilococcus	00:00 h	350.000 number of bacteria at the time of infection	350.000 number of bacteria at the time of infection
Stafilococcus	+24:00 h	↑ +99,999%	↓ 0%

Virus	Hours Orario	Standard handrail Corrimano standard	IAM+
Covid-19	00:00 h	6.88 Log TCID50 at the time of infection	6.88 Log TCID50 at the time of infection
Covid-19	+24:00 h	↑ 3.75 Log TCID50 after 24 h	↓ 3,17 (- 74,3%) Log TCID50 after 24 h

ANTIBACTERIAL

Thanks to a patented silicon-based cover enriched with nano silver particles, they are antibacterial and safe for public use.

ANTIBATTERICO

Grazie ad una copertura brevettata a base di silicio e arricchita con nano particelle d'argento, i prodotti IAM+ sono antibatterici e sicuri per uso pubblico.

COVID-19 TESTED

Tested by third-part laboratories, it has been proved that IAM+ reduces the presence of Covid-19 virus on its surface by 74,3%.

TESTATO COVID-19

Testato da enti esterni è dimostrato che IAM+ abbate del 74,3% la presenza del virus Covid-19 sulla sua superficie

CERTIFICATION

IAM+ systems have passed chemical, physical and mechanical tests and they have obtained the ISO 22196 certification.

CERTIFICAZIONE

I sistemi IAM+ hanno superato test chimici, fisici e meccanici e hanno ottenuto la certificazione ISO 22196 che ne certifica le proprietà antibatteriche e la sicurezza.

EASY TO ASSEMBLE

Easy to assemble on new applications, but they can also be mounted to an existing balustrade and handrail system.

FACILE DA MONTARE

Facile montaggio su applicazioni nuove ma è anche possibile montarli in sistemi balaustra e corrimano già esistenti.

CUSTOMIZABLE

The systems with antibacterial properties IAM+ are customizable or can be made on design, according to the construction site needs.

SU MISURA

I sistemi con proprietà antibatterica IAM+ sono personalizzabili o realizzabili su disegno in funzione delle esigenze di cantiere.

EASY TO CLEAN

The IAM+ systems are antibacterial, but if you want to clean them you can use cleaning solutions with neutral or acidic composition, avoiding products alkaline.

FACILE DA PULIRE

I sistemi IAM+ sono antibatterici ma se si desidera pulirli è possibile utilizzare detergenti con composizione neutra o acida, evitare prodotti alcalini.

Products line

La gamma di prodotti

65

Items IAM+ realized and in STOCK.

Articoli IAM+ in programma disponibili a stock.

+3000

On request, the entire IAM Design range can be supplied with IAM+ technology with over 3000 items.

Su richiesta tutta la gamma IAM Design può essere fornita con tecnologia IAM+ con oltre 3000 articoli.

But we can also realize not-standard products according to project needs.

Ma possiamo realizzare anche prodotti fuori standard secondo le esigenze di progetto.

Handrail Kits / Corrimani KIT

READY FOR INSTALLATION

Our new series of handrail kits come in satin and mirror polished stainless steel, as well as wood, ready to be assembled. The kit comes complete with handrail supports as well as 2 or 3 meter long tubes. Easy to install on any wall, our kits are perfect for any level of technical expertise.

PRONTI PER L'INSTALLAZIONE

Nuova serie di corrimani in kit in acciaio inox satinati, lucidi e in legno, pronti per il montaggio. Questi articoli vengono forniti completi di reggicorrimano e tubo da 2 o 3 metri. Facili da installare su qualsiasi parete è ideale per anche per i meno esperti.

Thanks to the **silicon-based coverage** of the products IAM+, the natural ripples, and micro incisions present on metal surface, are filled and flattened to create a **hard protective film**, so that liquids, dust, and other agents slide away that might otherwise corrode the steel. For this reason products with treatment Antibacterial are also **more protective and beautiful in time**.

Grazie alla **copertura a base di silicio** dei prodotti IAM+, le naturali increspature e micro incisioni presenti sulla superficie del metallo, vengono riempite ed appianate creando una **pellicola protettiva dura**, capace di far scivolare su di sè liquidi, polveri ed altri agenti che altrimenti potrebbero corrodere l'acciaio. Per questa ragione i prodotti con trattamento antibatterico sono anche **più protettivi e belli nel tempo**.
